

XPressEntry provides advanced security capabilities from a handheld device, ideal where a fixed reader is not feasible. XPressEntry is used across many industries, including Oil & Gas, Government, Construction, Military, Manufacturing, and more.

Emergency Mustering	Entry & Exit Tracking
Visitor Tracking	Event Management
Facial Recognition	Fingerprint Scanning

Time & Attendance	Confined Spaces
Bus Entry Validation	Vehicle Tracking
Canteen Management	Employee Surveys

Benefits

Improves Safety

Know instantly who is in your facility, where they are, and how long they've been inside.

Saves Time

Scanning badges with the handheld takes less time than using recording information on paper.

Supports All Badge Types

All major card types are supported including Prox, PIV, iClass, Barcodes, Magstripe, mobile credentials, etc.

Better Recordkeeping

Immediately report occupancy, missing users, and activity history without the errors of paper logs.
